Innovative Product Design

NITECORE leads the way in LED flashlight technology and design. MH27 was the recipient of the 2016 Red Dot Design award, an internationally recognized symbol of quality product design and excellence. The same attention to detail and innovative design in the MH27 is carried throughout the entire NITECORE product line.

Extreme Performance

NITECORE LED flashlights are built to outperform the competition. From the flagship Tiny Monster TM26, a 4000 lumen technological breakthrough, to the favorite P12, a tactical light with an intuitive user interface, NITECORE lights are the brightest, hardest working flashlights available.

Multi-Function Versatile LED Flashlights

From special modes to variable brightnesses, multi-colored LEDs, UV/IR LEDs and beyond, NITECORE flashlights take functionality to the next level. Each light has a conveniently located user interface and easy operation to make cycling through functions a breeze.

NITECORE also has many lights with Strobe Ready and rechargeable features making it a popular choice for industrial applications and law enforcement personnel.

Complete Dealer Program

Nitecore products are actively marketed worldwide and competitively priced. Dealer margins are generous and protected thanks to a diligently enforced MAP policy. Dealers are also supported with complete sales kit and US warranty service center. You can benefit from our NITECORE dealer program whether you are looking to launch a new business or expand your existing product portfolio.
