HUSQVARNA AUTOMOWER®

AUTOMOWER® WORLD LEADER IN ROBOTIC MOWING®

How it works!

To cut a little and often, is what leads to more efficient cutting and healthier grass.

IT'S EASY TO SET UP

Working area and areas you want your Husqvarna Automower® to avoid is defined by a boundary wire, which is easily laid out around the desired cutting area. Go to husqvarna.com to learn more.

COLLISION AND LIFT SENSORS

Collision and lift sensors increases safety. When the mower runs in to an object it will reverse, turn and choose another direction. If it is lifted the blade and mower will stop immediately.

NAVIGATION

+ The boundary and guide wires are staked to the lawn or buried just below the surface. A staked wire disappears into the lawn in a few weeks.
+ The mower stays inside the boundary wire laid around the perimeter of the working area.
+ The charging station transmits a signal to the wire that guides the mower where to cut and also guide it to the charging station.

IRREGULAR MOVEMENT PATTERN

+ No need for specific programming.
+ Covers all parts even if the lawn is complex and/or contains trees, flowerbeds, passages, etc.
+ Allows the grass to get cut from different directions. Creates a smooth carpet-like surface.

EFFICIENT CUTTING TECHNIQUE

+ The grass is cut with three fine, razor-sharp blades.
+ The three free-hanging blades are mounted on a disc and are easily replaced.
+ The blades can rotate back into the disc to minimize damage, should they hit hard objects – stone, branches, etc.
+ The grass mown is so fine and small that it does not need to be collected.

AUTOMATIC CHARGING SOLUTION

When it's time to recharge, the mower finds the charger by one of three methods.

1. By picking up a signal from the charge station antenna.
2. By following the guide wire back to the charging station.
3. By following the boundary wire until within reach of the home signal.

MOWING CYCLE

+ The concept is to keep short grass short. Husqvarna Automower®
+ Finds the charging station automatically.
+ Charges for approximately 60 minutes.
+ Resumes mowing, day in and day out regardless of the weather (except snow).

EFFORTLESS MOWING

Husqvarna Automower® uses razor-sharp blades to cut every blade of grass, resulting in a lush, green lawn that conventional blades cannot achieve. The grass clippings become a natural fertilizer, helping keep lawns lush, green and weed free.
