

W107418353**Fleece Filter Bag, 5/pk, VC4210****PERFORMANCE** : Captures larger debris to extend the life of the main Flat Filter**CONVENIENCE** : Dust hose port is designed to close for clean and easy debris disposal**DUST MANAGEMENT** : For use during collection of dry debris only**AVAILABLE** : Convenient 5 pack**INCLUDES** : Fleece Filter Bag, 5/pk, VC4210**ABOUT MODEL**

The Makita® Fleece Filter Bag is designed for use with the Makita® 11 Gallon Wet/Dry HEPA Filter Dust Extractor/Vacuum (VC4210, sold separately) to capture dust and debris. The bag features a fleece design for added durability. Like a first-stage pre-filter, the fleece filter bag captures larger particles and extends the life of the main flat filter. It installs quickly and easily for added user convenience.

FEATURES

- Performs the function of a first stage pre-filter by capturing larger particles and extending the life of the main Flat Filter (W107418351)
- Dust hose port is designed to close for clean and easy debris disposal

- For use during collection of dry debris only
- Convenient 5 pack
- For use with Makita Wet/Dry Dust Extractor/Vacuum model VC4210L
