Mini-split and multi-split systems

Two main components of **mini-split systems** are an outdoor compressor/condenser, and an indoor unit for air handling. This houses power, communication, copper tubing and the condensation drain line that links the indoor and outdoor units.

These mini-split heat pump are great for new or existing homes and make excellent retrofit additions to non-ducted **heating systems** such as radiant panels (hot water), hydronic (hot) heat, space heaters (wood kerosene, propane) and radiant panels (hot/cold). These heat pumps are also a great choice for small rooms that don't require a large space conditioning system, or room additions in which it is impossible to extend or install distribution ductwork.

Ducted central systems in North Scottsdale AZ

The ductwork for central air conditioning systems is expensive and difficult to install. Anyone who's had central air installed knows how expensive and prohibitive it can be.

No matter what time it is, our HVAC specialists are always available. We are available 24/7 to provide emergency assistance if you need it.

DUCT CLEANING in North Scottsdale AZ

Dust, dirt, and even mold may accumulate in your air duct system over time, making it less efficient and hazardous for your house.

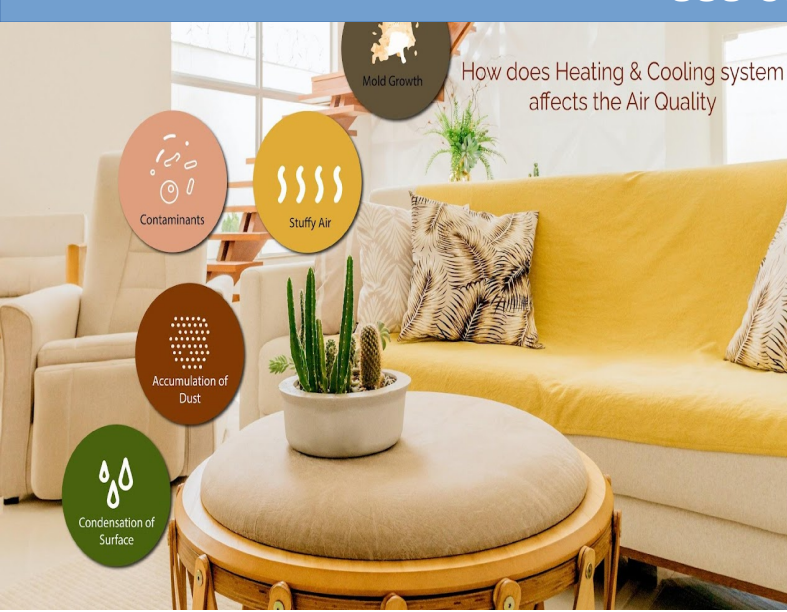

Our regional air duct cleaners can clean air vents, heating and cooling systems, as well as enhance the quality of your air and clean your dryer, making your units more energy efficient and providing additional health advantages.

The junk build-up in your air duct system will be removed by our antimicrobial treatment and the skillful work of our air duct cleaning specialists, restoring the freshness of your house.

We also provide other ductwork services such as:

- ☐ duct repair
- ☐ duct installation
- ☐ Duct Insulation
- ☐ duct cleaning
- ☐ duct sealing

For more information or to schedule an appointment, please contact us at 888-672-1003

INDOOR AIR QUALITY in North Scottsdale

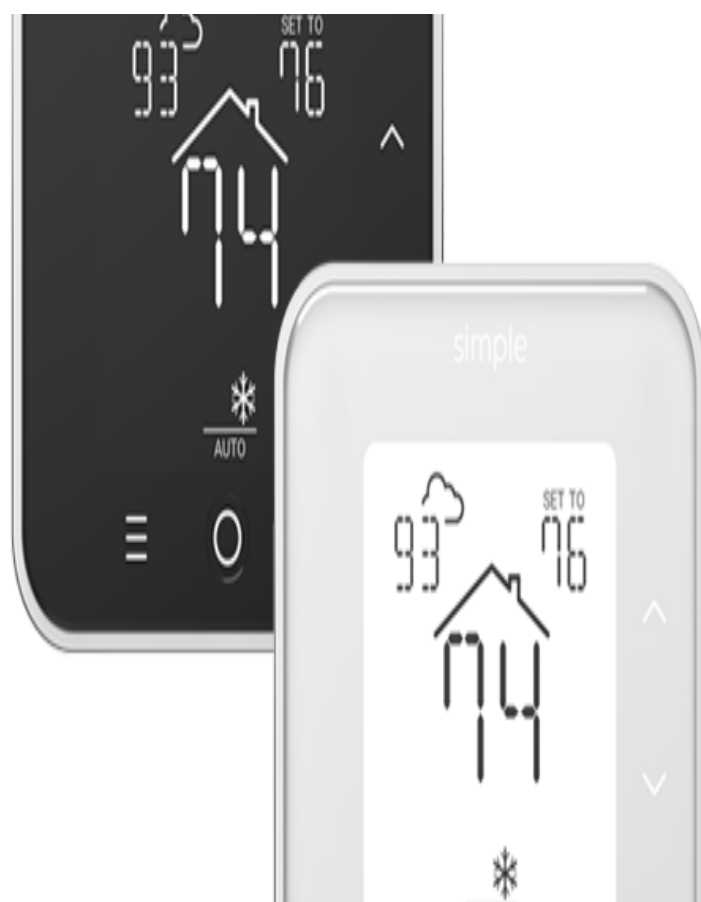

Indoor air quality is an important aspect of home life that many homeowners fail to recognize. The quality of the air in your house plays an important role in your family's health and well being. We offer premium indoor quality services that will ensure your family's safety and health, whether you require a humidification system in North Scottsdale to counter the dry desert air or professional cleaning. To schedule **indoor air quality service in North Scottsdale, AZ**, please **call 888-672-1003** to find out more.

Thermostats sale and services in North Scottsdale

The best thermostats are flexible and will save you money.

The original Nest Learning Thermostat was launched in 2011. It offered Wi-Fi connectivity and a puck-shaped design that allowed you to track your day and set heating and cooling times. Although the Nest was not the first thermostat connected to the internet (Canadian-based Ecobee did it two years earlier), it helped create a new market. Nest and Ecobee are both still in business, but they now have to compete with HVAC industry giants like Honeywell, Trane, Carrier and Carrier.

Smart thermostats can provide a range of functions that not only keep your home warm but also reduce cooling and heating costs. Even though the most basic models can be quite affordable, they still have Wi-Fi circuitry which allows you to connect to the internet and your home network. You can control them from your smartphone, tablet or mobile phone using an app. Some models let you also use a web browser to access the internet.
