

## Novoclinical Data Export Format

C-CDA (Consolidated Clinical Document Architecture) – Each patient will have a C-CDA document in the exported data.

CSV – Comma separated value, used for patient demography, Appointments.

Data export can be done by clinic administrators by navigating to Communication > Data Export

The below page opens and let you choose the specific patient export or group export of all or multiple patients. Once exported administrator will be able to export the data in a ZIP file which will contain the CCD-A, CSV file.

The screenshot displays the Novoclinical web application's 'Data export' interface. The top navigation bar includes links for Appointment, Doc And Notes, Patient, Communication, Coding, Accounting, Reports, Admin, Inventory, and Su Admin. A search bar on the right allows users to 'Search a patient'. The main content area features a 'Data export' tab and a 'Create New' button. Below this, there are filters for 'Doctor' (set to 'All Doctors') and 'Frequency' (set to 'MONTHLY'). A date and time picker is visible, with fields for HH, MM, and SS. The 'Appointment' section includes 'FROM' and 'TO' date and time pickers. At the bottom, there is a 'Search a patient' input field and two buttons: 'Create New' (green) and 'Reset' (red). The footer contains copyright information: 'COPYRIGHT © 2016 NOVOCLINICAL. ALL RIGHTS RESERVED | PRIVACY POLICY | TERMS OF USE | HIPAA POLICIES AND PROCEDURES MANUAL' and a 'Note' icon.
