This article covers new features and functionality available in Recurring Donations 2.0

Open Ended Recurring Donations

With Recurring Donations 2.0, the recurring donations package now supports open-ended donations. These donations (Opportunities) represent open-ended giving plans from your constituents, and automatically update themselves on a nightly basis to maintain a forecast-able set of donations into a configurable timeframe in the future.

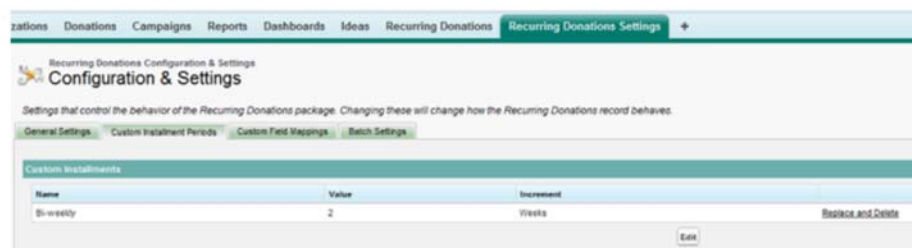

Recurring Donation Settings

A new settings interface gives you the ability to adjust and configure a variety of behaviors in your Recurring Donations

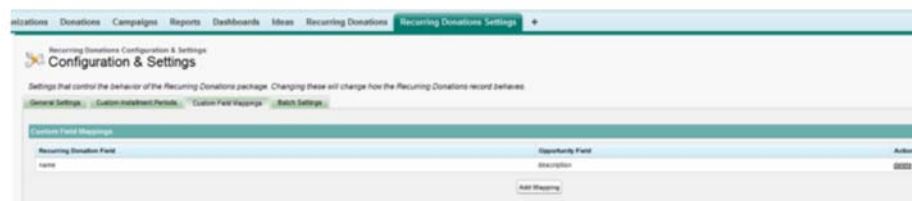

package.

Custom Installment Periods

With Custom Installment Periods, you can create your own installment types to suit your user's and constituent's needs.

Custom Field Mappings

Custom Field Mappings allow you to automatically copy values from the Recurring Donation object down to the related Opportunities.
