## NPSP: Recalculating Opportunity Rollups

Opportunity Rollups can be set to recalculate in real time, or they can be turned off and only recalculate on demand. Even if they are set to recalculate with triggers, there are scenarios where the data can change and the rollups do not recalculate. If you want to force a recalculation of all the rollups, it's easy to do.

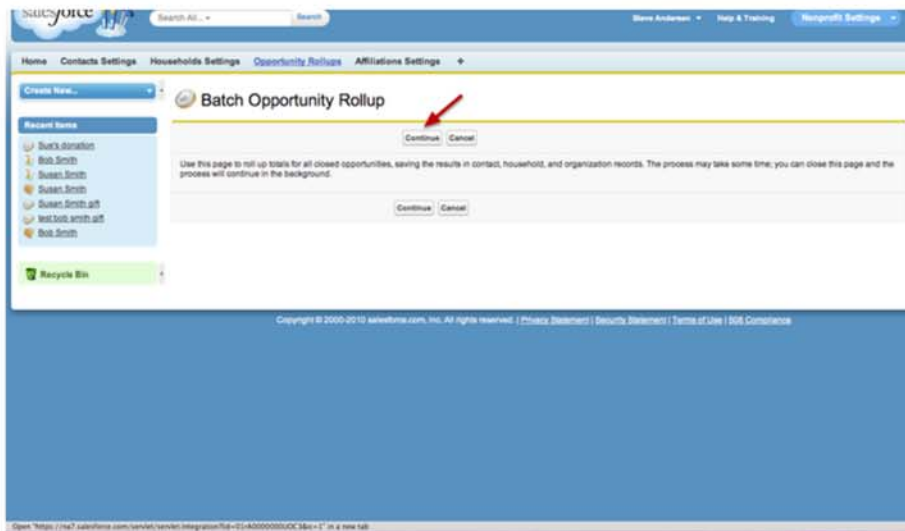

Go to the Opportunity Rollups Tab

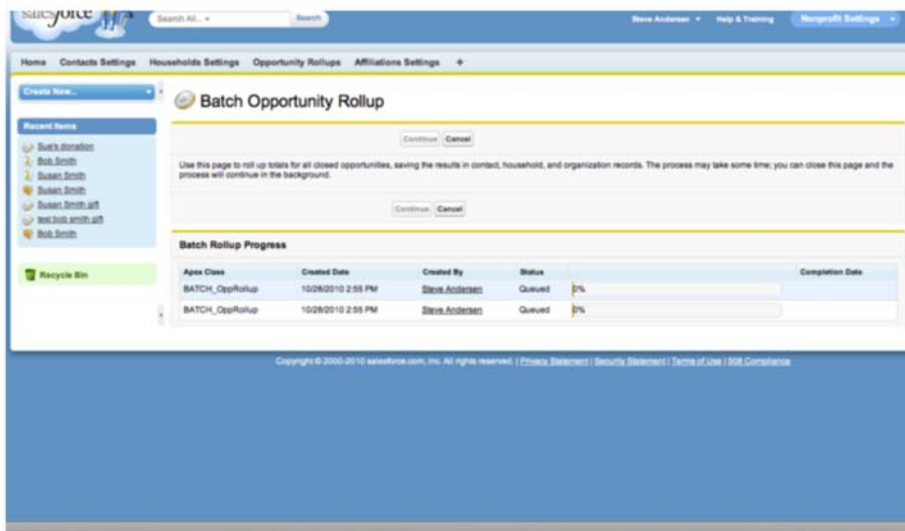

If you don't see the Tab, click the '+' Tab

Click Continue to Start the Recalculation

View the Progress of the Rollups

You do not have to stay on this page. The rollups will complete on their own--the page is presented only for your information.

There are four total rollup types that are recalculated: Contact, Account, Household and Soft Credit
