

nuherbs Bespoke Extracts

Reduce Regulatory Cost & Increase Compliance

By setting the manufacturing parameters, you know how your extracts are made and from exactly what.

Traceability

Every lot of extract is fully traceable and accompanied by samples of the exact lot of herb used.

ODI Solvents

There won't be any surprises, you can only choose from water, ethanol, or a combination of water and alcohol as solvents.

Custom Tailored

Because each lot is made for you, you can be assured it is fit for your application and extracted your way.

Identity Assured

Manufactured using organic or pharmacopeia herbs that have been positively identified using a variety of identification methods.

Manufactured in the USA

Made at an organic and NSF cGMP certified facility. Eliminate the need for FSMA's Foreign Supplier Verification.

Bespoke extracts keep true to our herbal roots, by using a collaborative process and time-tested production methods to produce extracts that offer full traceability from the best botanicals to your exact specifications, ensuring regulatory compliance and optimal performance in your product.
