Email Address: brian.rodgers@ucb.com

INDICATION: VIMPAT® is indicated in patients 17 years and older with partial-onset seizures as monotherapy or adjunctive therapy. VIMPAT® injection for intravenous use is an alternative when oral administration is temporarily not feasible.

SELECT IMPORTANT SAFETY INFORMATION

Warnings and Precautions

Antiepileptic drugs (AEDs), including VIMPAT, increase the risk of suicidal behavior and ideation. Patients taking VIMPAT should be monitored for the emergence or worsening of depression, suicidal thoughts or behavior, and/or any unusual changes in mood or behavior. Patients and caregivers should also be advised to be alert for these behavioral changes and to immediately report them to the healthcare provider.

Common Adverse Reactions

In adjunctive placebo-controlled trials, the most common adverse reactions ($\geq 10\%$ and greater than placebo) were dizziness, headache, nausea and diplopia. In the monotherapy trial, adverse reactions were generally similar to those observed and attributed to drug in adjunctive placebo-controlled trials, with the exception of insomnia (observed at a higher rate of equal to or greater than 2%).

Please click here for full prescribing information or visit www.VIMPAT.com/hcp/.

This event is conducted in accordance with the PhRMA Code on Interactions with Healthcare Professionals and is limited to Healthcare Professionals. Attendance by guests or spouses is not permitted. Federal and state laws restrict and/or require disclosure of items UCB provides to Healthcare Professionals, including meals, refreshments, and transportation. UCB is committed to complying with all legal requirements. If you are subject to a restriction based on your practice location or institutional affiliation, UCB kindly asks that you not attend this event.

Attendees from Minnesota and Vermont, please identify yourself as you check in and you will be seated to accommodate your state regulations.
