

Infusion Confusion

Presenter: Donna Matocha, DNP, MSN, CNRN, VA-BC, Centurion Medical Products

Attendees will gain knowledge through the following objectives of the presentation:

1. Review the causes of infusion pump alarms
2. Summarize strategies to minimize contributors to alarms
3. Revise current practice for delivering infusion therapy.
4. Questions and Answers

Bio for Dr. Donna Matocha

Dr. Matocha has been a nurse since 1998. She began her career in nursing following her son's successful battle with leukemia. Her passion for vascular access began through the care of her son's central line. Donna has held staff, management and educator positions. She currently holds a Doctorate in Nursing Practice following the dissemination of her work on reducing infusion pump alarms and also holds a Master's degree in Nursing. She holds certification in Neuroscience Nursing and is Vascular Access Board Certified. Donna implemented a successful quality improvement project and reached zero catheter infections at a mid-size hospital in the Chicago area. Her results, "Achieving Near-Zero and Zero: Who Said Interventions and Controls Don't Matter?" was published in the Journal of the Association for Vascular Access. Donna recently completed her Doctorate in Nursing Practice following the dissemination of her work on reducing infusion pump alarms. Dr. Matocha is employed by Centurion Medical Products.
