www.collabriacare.org/APCC

PROGRAM OBJECTIVES

1. Utilize a 6-step process to refine patient treatment preferences and develop a plan of care
2. Discuss treatment options for elderly patients with end-stage kidney disease
3. Examine complementary therapy effectiveness in reducing symptom burden of severe lung disease
4. Share examples of integrated telehealth principles in palliative medicine
5. Identify advance care planning strategies successfully implemented in a Veterans home community
6. Compare and contrast Medicare hospice general inpatient care to hospital comfort care
7. Describe the benefits, challenges, and barriers to high quality care for people with serious illness
8. Discuss strategies for overcoming barriers and challenges for providing palliative care to people with serious illness
9. Describe how healthcare institutions and systems can implement palliative care services across the continuum of care including outpatient and home to increase the value of healthcare
