

DESCRIPTION

TNCC, widely recognized as the premier course for hospitals and trauma centers worldwide, empowers nurses with the knowledge, critical thinking skills, and hands-on training to provide expert care for trauma patients.

- Rapid identification of life-threatening injuries
- Comprehensive patient assessment
- Enhanced intervention for better patient outcomes

ENA developed The Trauma Nursing Core Course to establish a standardized body of trauma nursing knowledge and to improve the care of all trauma patients. This seventh edition course combines interactive learning with scenario-based assessments to give nurses a comprehensive learning experience. The course includes:

A Systematic Approach of Initial Assessment

The first few minutes of trauma care are critical to achieve better patient outcomes. The A – I mnemonic and the Trauma Nursing Assessment will assist nurses in providing appropriate and early intervention.

Hands-on Training Using both an Individual and Team Approach

Three Psychomotor skill stations offer nurses the opportunity to practice the systematic approach of the initial assessment in real life situations. The skill stations covered are Trauma Nursing Process, Airway and Ventilation, and Trauma Interventions.

2 Day Intensive Course with Expert Instructors

TNCC is a 2-Day Intensive Course that is taught by expert instructors. There is a faculty ratio of approximately one faculty per four learners.

5 Online Modules with Live Links to Additional Information

These interactive modules allow students to apply what they learn and receive immediate feedback. The modules are a complete case study process—taking the nurses through an entire sequence of care. Online learning allows nurses to learn at their own pace and refer back to information at any time.

PROGRAM

24 Chapter Comprehensive Manual

The TNCC Seventh Edition contains evidence-based content developed by trauma experts to reinforce and supplement the lectures and skill stations. It is a compilation of current trauma nursing standards and is a valuable resource for future reference.

Chapter Titles

Trauma Nursing and the Trauma Nursing Core Course	Spinal Cord and Vertebral Column Trauma
Teamwork and Trauma Care	Musculoskeletal Trauma
Epidemiology	Surface and Burn Trauma
Biomechanics, Kinematics, and Mechanisms of Injury	Special Populations: The Pregnant Trauma Patient
Initial Assessment	Special Populations: The Pediatric Trauma Patient
Airway and Ventilation	Special Populations: The Older Adult Trauma Patient
Shock	Special Populations: The Bariatric Trauma Patient
Pain	Special Populations: The Interpersonal Violence Trauma Patient
Brain, Cranial, and Maxillofacial Trauma	Psychosocial Aspects of Trauma Care
Ocular Trauma	Disaster Management
Thoracic and Neck Trauma	Transition of Care for the Trauma Patient
Abdominal and Pelvic Trauma	Post Resuscitation Care in the Emergency Department

Evaluation, Verification, and Contact Hours

Successful completion of the course requires 80% or greater on the multiple choice exam and 70% or greater on the skill station evaluation.

RN Candidates with successful completion will receive the ENA TNCC 4 year provider verification card.

All attendees will be awarded contact hour certificate with appropriate contact hours.

17.65 contact hours are awarded for course completion.
