

NIOSH Approved Pulmonary Function Training

2 days – Full Course, 1 day – Refresher Course

Overview

Participants in this course learn spirometry technique that is approved by NIOSH and the American Thoracic Society. They become familiar with applicable OSHA standards, ATS recommendations and NIOSH guidelines. Basic pulmonary anatomy and physiology, FVC, FEV1 and FEV1/FVC calculations are taught. Various types of spirometers on the market are represented and the advantages and disadvantages of each are addressed. This course consists of lecture and supervised practicum. Instructor-student ratios ensure many opportunities for individualized instruction.

Goals

Participants in this course learn spirometry technique that is approved by NIOSH and the American Thoracic Society. They become familiar with applicable OSHA standards, ATS recommendations and NIOSH guidelines.
