PERIANESTHESIA POTPOURRI

This review is designed to provide the RN and other health care professionals current information on pathologies, therapies, techniques and standards which contribute to safe, quality, patient care in the perianesthesia setting.

CLASS OBJECTIVES

The participant will be able to:

1. Discuss electronic nicotine delivery systems (ENDS) and how they relate to healthcare
2. Describe different options for advanced osteoarthritis
3. Discuss perioperative concerns related to liver diseases
4. Identify perioperative risks during pre-op assessment
5. Describe physiological changes impacting the surgical pregnant patient
6. Relate surgical interventions for other gynecological conditions

Disclosure Statement: All planners and presenters at nursing continuing education activities are required to disclose to the audience any significant financial relationships with the manufacturer(s) of any commercial products, goods or services.
