

# Online Feeding Tube Resources for Adults & Children

---

## Websites devoted to people with feeding tubes:

- **Feeding Tube Awareness** [www.feedingtubeawareness.org/](http://www.feedingtubeawareness.org/) this is a very comprehensive website for parents with information on navigating the life with tube feedings. There are numerous resources and a parent guide that can be downloaded. Even though this was created for pediatric patients, much of the information and resources also apply to adults.
- **MyTubeFeeding** [www.mytubefeeding.com](http://www.mytubefeeding.com) Nestle-sponsored tube feeding resource for adults including information to support their first day home with tube feeding, educational resources and information on pumps and tubing.
- **Oley Foundation** <http://oley.org/> tips, stories, newsletters and multiple resources for people fed by tube or IV including the **Tube Feeding Troubleshooting Guide**.

## Websites from manufactures and suppliers of feeding tubes and nutrition:

- **AMT** <https://www.appliedmedical.net/gi-products/> Education and information about the MiniONE® gastrostomy buttons and tubes.
- **Coram** [https://coramhc.com/patients/education/tube\\_feeding\\_peds.aspx](https://coramhc.com/patients/education/tube_feeding_peds.aspx) tube feeding patient education videos for adult and pediatric patients.
- **Infinity Enteral Pump** <http://infinityfeedingpump.com/learning-center/>
- **Kangaroo Pump Training\*** [www.kangaroopumptraining.com](http://www.kangaroopumptraining.com)
- **Mic-key** <http://www.mic-key.com/> MIC-KEY\* tube care and usage instructions, real stories, newsletters and more.
- **Shield Healthcare** <http://www.shieldhealthcare.com/community/nutrition/> tube feeding videos and blogs.

## Helpful websites with feeding tube information:

- **American College of Surgeons: Feeding Tube Home Skills Program** <https://www.facs.org/education/patient-education/skills-programs/feeding-tube> orderable kit with booklet and DVD. You can view the sample tube feeding skills booklet for free.
- **Complex Child** <http://complexchild.org/medical/gi/> a free monthly online magazine written by parents of children with special healthcare needs and disabilities.
- **My Tubey Books** <http://mytubeybooks.com/> a colorful book series that gives children with feeding tubes.

## Recommendations for other helpful online resources:

- Websites for specific conditions requiring feeding tubes such as [Cystic Fibrosis](#), [Muscular Dystrophy](#) and [Oral Cancer](#).
- Feeding tube manufacturers, nutrition and medical supply company websites.
- Hospitals and home health companies may also have information on their websites.
