

## FOCUS OF CONFERENCE

The Hawaii Chapter of Perianesthesia Nurses (HIPAN) educational offerings provide important links to advancing our professional nursing practice. This educational offering will include the following: Post-Op Care for Liver and Kidney Transplant Patients, Cardiac Considerations for Patients Undergoing Anesthesia, OB Emergencies and Code Crimson, Perianesthesia Nursing Can Be Risky Business: Decreasing your Susceptibility, Perioperative Glucose Management, and Caring for Patients After Joint Replacement Surgery.

American Society of Perianesthesia Nurses (ASPAN), the professional organization for the specialty of perianesthesia nursing, is responsible for defining and establishing the scope of perianesthesia nursing. In doing so, ASPAN recognizes the role of the American Nurses Association (ANA) in defining the scope of practice for the nursing profession as a whole. ASPAN's goal is to enhance knowledge and skills in the Perianesthesia Practice.

This continuing nursing education activity is in the planning process for Nursing CE's awarded through the Continuing Nursing Education Group (CNEG), an accredited approver by the American Nurses Credentialing Center's Commission on Accreditation.
