Overview

Program description

Understanding the important aspects of fundamental principles in vascular access can help us systematically approach clinical decisions. This presentation will explore clinical guidelines, how to integrate evidence, standards, position papers and your clinical experience to create a plan of care as they relate to products and achieve best outcomes for patients. Policy and device selection will be included as well as scenarios on problem solving complications.

Program details

Presenter:
Nadine Nakazawa
RN, BSN, VA-BC

Learning objectives:
Objectives for this presentation are:
• Describe the impact of evidence-based clinical practice guidelines for the Vascular Access Management process as it relates to clinical judgement
• Identify the critical thinking steps to take when trying to make a clinical decision in complex vascular access situations
