

DESCRIPTION

The Trauma Nursing Core Course (TNCC) is a one and a half day course developed by the Emergency Nurses Association to present a firm foundation in trauma nursing and to provide nurses with core or basic trauma cognitive knowledge and psychomotor skills that are associated with the delivery of professional nursing care to the trauma patient.

The goal of TNCC is to improve trauma patient outcomes by providing nurses with foundational trauma knowledge, skills, and a systematic Trauma Nursing Process to guide trauma patient care.

Verification of successful course completion is based on passing the written exam and the Trauma Nursing Process (TNP) psychomotor skills station. Verification is valid for four years.

PRE-REQUISITES Participants must be an RN and possess a current unrestricted nursing license to receive verification.

It is preferred that participants have at least six months of clinical nursing experience in an emergency care setting before attending the course. It is assumed that the course participant possesses generic nursing knowledge, has an understanding of emergency care terminology, and has familiarity with standard emergency equipment.

REGISTRATION Pre-registration is required

Participant seats are limited based on instructor to-student ratios. Seats will be assigned to paid registrants in the order registration fees and materials are received.

Pre-course preparation is essential. This includes completing the online modules and studying the 8th edition TNCC Provider manual.

Email address is REQUIRED to complete on-line modules and for course confirmation.

PROGRAM

This new and improved edition brings exciting new features and course structure. Features include:

- Virtual learning modules including avatar-based simulation
- Interactive teaching strategies
- Electronic, open-book testing
- Updated evidence-based provider manual
- One and a half-day course
