

# Bleeding Management in Surgery CE Course

**Date: Saturday, January 4, 2020**

**Location: AORN Meeting - Medical City Dallas**

**Time: 9:00AM**

**Contact: Morgan Clark**

## Overview

Although the scientific application of adjunctive hemostats has come a long way regarding development and innovation, confusion may still exist on what technology to be utilized for the surgical patient and by the OR team. Bleeding management in surgery, covers the practices of utilizing adjunctive hemostats in the application of addressing bleeding, incorporating AORN Guidelines. This continuing education seminar will discuss clinical implications of surgical bleeding, distinguish between primary and adjunctive methods of surgical hemostasis, and patient trends that contribute to increased risk of disruptive surgical bleeding.

## Objectives

Upon completion of this continuing educational activity, the participant should be able to:

1. Identify the clinical implications of surgical bleeding.
2. Differentiate between primary and adjunctive methods of surgical hemostasis.
3. Describe recent patient trends that contribute to the increased risk of disruptive surgical bleeding.
4. Identify key factors to consider in the selection of hemostatic products.

### To receive credit for this course and a certificate of attendance, follow these instructions:
