

DESCRIPTION

A child with an acute illness or injury requires special knowledge and skills, and ENA's Emergency Nursing Pediatric Course (ENPC), the only pediatric emergency nursing course written by pediatric nurse experts, is designed to provide them. Through a combination of a two-day intensive course with expert instructors, hands-on training and practice, and on-line learning, you'll gain the core-level knowledge and skills to care for your smallest patients in the emergency care setting.

The new, just launched and completely revamped version of ENPC provides an engaging learning experience designed to enhance your ability to care for a pediatric patient:

- A systematic approach to the initial assessment of any pediatric patient
- Multi-platform learning with a provider manual, interactive pre-course online modules, and instructor-led classroom activities
- Hands-on skill stations for trauma, respiratory emergencies, and procedures and sedation
- Avatar-driven simulation experience
- Interactive exercises to explore prioritization and various pediatric emergency patient presentations
- Evidence-based provider manual, both in print and as an e-book with added features
- Case-scenario-based online modules, some with avatar-driven simulation experiences
- Patient experience videos that allow you to hear from pediatric patients and their caregivers
- Electronic testing that saves classroom time and allows you to test wherever you choose, using the provider manual as a reference

After successfully completing the in-class skills testing and online written examination, you will be granted internationally recognized status as an ENPC Provider for four years.

PROGRAM

- 12 interactive, online pre-course online modules (MANDATORY completion)
- Instructor-led classroom component
- Hands-on skills testing
- Online examination
