

NET Cancer Awareness Day is November 10th

- Neuroendocrine Tumors (NETs) are rare tumors that develop from hormone producing cells that line the pancreas (PNETs) and GI tract and lungs (carcinoids).
- Over 90% of all Carcinoid/Neuroendocrine Tumor (NET) patients are incorrectly diagnosed and treated for the wrong disease.
- Neuroendocrine Cancer Awareness Network
- NET Cancer Day is a day to raise community awareness for NETs, inspire those living with NETs and advocate for improved scientific advancements for the treatment of NETs .
- Follow the NET Cancer Day's Facebook page at facebook.com/netcancerday and post awareness using #LetsTalkAboutNets and #NETCancerDay.
- Get involved and download a ribbon at <https://incalliance.org/download-net-cancer-day-ribbon/>
