Zoom link provided after registration for those attending virtually

Presenter

**Grace Thornhill Ph.D.
Infection Prevention, Fellow
Boston Scientific Endoscopy**

This one-hour CNE activity will examine the data on the efficacy of duodenoscope processing, the impact on the risk of infection, and evaluation of new technologies designed to address the issue. Participants will receive information enabling them to be proactive in their infection prevention strategies for endoscopes as they choose solutions related to the handling of these complicated endoscopes.
