

Spotlight on the Post Masters Clinical Nurse Specialist Certificate

Clinical Nurse Specialists are one of four Advanced Practice Registered Nurse (APRN) roles. The CNS receives advanced clinical training with additional advanced training in nursing practice and systems leadership. The CNS uses their advanced knowledge to:

- Provide clinical education in the practice setting
- Support nursing staff in delivering the best evidence-based practices
- Lead quality improvement initiatives
- Serve as the voice of front line staff at decision making tables
- Conduct patient rounds
- Consult with nurses, physicians, and other members of the multidisciplinary team

Do you have a previously earned Masters Degree in Nursing?

Are you interested in meeting the requirements to earn your APRN licensure as an Adult / Gerontology Clinical Nurse Specialist?

- Complete the program in as little as 3 semesters
- Hybrid classes
- Clinical rotations can often be completed in the students local area
