

World Cancer Day

- February is **cancer prevention month** and **February 4** is **World Cancer Day**.
- Cancer is a **leading** cause of death in the US and the world.
- Over **one third** of cancers are **preventable** but many people don't have access to care.
- You can get **involved**, no matter how much time you have.
- **Learn** more about cancer and how to reduce your risks. **Promote** world cancer day and cancer awareness on social media, and **spread the word** in your community and among your networks.
- Let's work **together** to make a change to create a future **without** cancer. We are "strong alone but **unstoppable** together".
- Get all the details and tools at www.worldcancerday.org/
