

# **Ceribell Sponsored Dinner:**

## Time in Seizure is Brain: Managing CSE and NCSE

**September 12, 6:00 PM - 8:00 PM**

### **The Virden Retreat Center**

1155 College Drive  
Lewes, DE 19958

Convulsive seizures are easy to identify, but a significant number of seizure patients, as well as those with altered mental status, suffer from “silent” non-convulsive seizures.

Join us for dinner and learn from Erin Werking about:

- Patient presentation of non-convulsive seizures
- The importance and practical application of POC EEG to aid in rapid diagnosis
- Appropriate intervention to treat these subclinical seizures

**RSVP NOW**

#### **GUEST SPEAKER**

#### **Erin Werking, BSN, RN**

National Program  
Implementation Manager  
Ceribell, Inc.

Erin is a critical-care and trauma nurse with 21 years of hospital experience. As a veteran Johns Hopkins Bayview Medical Center employee, she worked as an ICU charge and trauma room resource, as well as fulfilling leadership roles such as rapid response team lead, float pool nurse educator and nursing supervisor (PCC). Erin has been a dedicated advocate for advanced neurological care at Ceribell for the past 4.5 years. She has trained staff on the use of the Ceribell system at numerous renowned academic institutions across the country.
