ABOUT DR. VELAMURI

Sarma Velamuri, MD is a world-class sepsis expert and thought leader **committed to saving lives with AI.**

Dr. Velamuri is a published, board-certified Internal Medicine physician. Among his many accomplishments, he was a hospitalist at Baylor College of Medicine (BCM), serves on the Catholic Health Initiatives (CHI) sepsis committee, and was appointed as the 2018 Sepsis Champion for HCA-Houston.

He's also served as the Medical Director of a Fortune 500 company and was an active board member at the Texas Medical Center Sepsis Collaborative. Dr. Velamuri presented as the keynote speaker for Stanford University's Hack from Home healthcare innovation hackathon and has spoken at various other premiere events including the FBI's Biotechnology Security Summit and UC Berkeley's Hacks for COVID 2020 panel.

ABOUT LUMINARE

Luminare is a revolutionary software platform that integrates with your current sepsis care workflow and leverages artificial intelligence (AI) and our patented patient phenotyping algorithm to greatly accelerate the speed of sepsis detection and treatment to save lives, streamline communication, simplify reporting, and increase revenue.

Luminare presented its life-saving sepsis detection solution at the HIMSS EPIC Interoperability Showcase in 2021, and was awarded "Most Promising Web & IT Company" in the US by the Rice Alliance for Web & IT, and is proud to be a part of the Texas Medical Center's Innovation Institute.

To book Dr. Velamuri for consulting, speaking engagements, or media appearances, please email booking@luminare.io.
