

Prairie Horizons:

Nurturing the Future of Nursing in North Dakota

September 13, 2024 | Bismarck, ND

Mylynn Tufte, RN, MBA, MSIM

Senior Director & Partner - Strategy & Growth, Population Health

The AI Advantage: Enhancing Nursing Practice through Technology

With more than 25 years in the health care industry, Mylynn Tufte serves as the leader for Optum's Strategy Population Health Management (PHM) Practice. As a former state health official, she has experience leading the state department of health during the COVID-19 public health emergency, establishing health policy, developing and implementing strategic priorities. Ms. Tufte specializes in population health management, health strategy and health equity. She has helped organizations improve quality and access to care, decrease the total cost of care, and improve the overall experience for consumers. Her diverse experience includes working with federal, state, local and tribal governments, payers, providers and commercial clients. Mylynn holds a Master of Business Administration and Master of Science in Information Management from Arizona State University, Tempe Arizona. Her Bachelor of Nursing degree was earned at Case Western Reserve in Cleveland, Ohio.
