Re: Illinois DDNA Network Annual Conference CE Application

To Whom It May Concern:

The Developmental Disabilities Nurses Association has reviewed your group's application for its upcoming continuing education program.

DDNA has determined that the program satisfies the criteria for continuing education for I/DD nursing certification. The contact hours may be used toward the required continuing education for CDDN or DDC nursing certification.

<u>Date</u>	<u>Program Title</u>	<u>Contact Hours</u>	<u>Approved for Certification Continuing Education</u>
10/30/2024 – 10/31/2024	21 st Annual Illinois DDNA Conference	11.5	YES

Please note: These contact hours also may or may not meet state licensure requirements for continuing education. It is each nurse's responsibility to determine whether or not these contact hours may be used toward his/her nursing licensure continuing education requirements.

Offering continuing education at the local level is of tremendous benefit to the practicing I/DD nurse, and helps promote the expertise of the specialty as a whole. DDNA thanks you for your continued support of the I/DD nurses in your area!

If you have questions or need additional information, please contact the DDNA office.

Best Regards,

S. Diane Moore, BSN, RN, CDDN
Executive Director
