

Time in Status is Brain: Managing NCSE in Your Facility

October 14, 6:30 PM - 9:00 PM

Jim's Steakhouse

110 SW Jefferson Avenue
Peoria, IL 61602

Convulsive seizures are easy to identify, but a significant number of seizure patients, as well as those with altered mental status, suffer from non-convulsive seizures.

Join us for dinner and a presentation by Mary Kay Bader about:

- Patient presentation of non-convulsive seizure
- The importance and practical application of POC EEG to aid in rapid diagnosis
- Appropriate intervention to treat these subclinical seizures

RSVP NOW

Heart of Illinois-AACN members & prospective members RSVP on our Nursing Network website. <https://hoiaacn.nursingnetwork.com/> Register at no cost in Events area under 10-14-2025 Heart of Illinois-AACN Meeting & Dinner Program

GUEST SPEAKER

Mary Kay Bader
RN, MSN, CCNS, FNCS, FAHA

Neuroscience Critical Care CNS
Mission Hospital, Mission Viejo, CA
Past President, NCS & AANN
Paid consultant to Ceribell, Inc.

Mary Kay Bader has over 40 years of experience with an emphasis in neuroscience/ICU. Practicing in a variety of hospitals (teaching/community) across the country, Ms. Bader has functioned in roles such as ICU staff nurse, trauma nurse responder, clinical educator, clinical faculty, and clinical nurse specialist. She has held clinical and joint faculty positions at Georgetown University and Loyola University of Chicago. Currently, Ms. Bader is employed as a neuroscience/critical care clinical nurse specialist working collaboratively with team members developing protocols and integrating technology into the care of the critical neuro and hypothermia patient populations.
