

# Supporting **you** to make healthcare better

## Creating a safe culture:

Empowering staff with evidence-based practices and products to create evidence-based outcomes

This course presented by one of Stryker's experienced clinical consultants will examine the characteristics of organizations that foster a culture of safety, the impact of worker injuries, and the value of moving from siloed efforts to unified strategies. It will also highlight how technology can support safer environments and improved outcomes.

### Key objectives

- List the characteristics of organizations where a culture of safety exists and why it is important to healthcare quality
- Discuss the mechanisms of healthcare worker injury, and the associated financial and quality issues
- Describe the benefits of moving from a siloed approach to a single improvement initiative, and how technology can impact outcomes

**MedicalEducation**  
Empower. Educate. Innovate.
