

Connecting as a Guest to the Texas A&M - Central Texas Events Wireless Network

Greetings, **Nursing Professional Org**

You have been granted access to the University events wireless network, which you can use to access both the World Wide Web and Internet, and to check your personal email.

Your guest pass key is: **UfNztBny**

This guest pass is valid until **2 DAYS from first use**

Connect your wireless-ready PC to the following network(s): **TAMUCT-Events**, as detailed in the instructions printed below.

Before you start, please review the following requirements.

Connecting

Using your guest pass to connect requires a series of two procedures: (1) connecting your PC to the university "events" network, then (2) logging in as a qualified guest.

Finding the Wireless "Events" Network

- 1 On your PC/Windows desktop, check the system tray for a Wireless Connection icon.
- 2 Click on this icon to display the wireless connection list
The name of your events WLAN will be listed in the wireless connection list
- 3 Select your events WLAN and click **Connect**.
- 4 If a Wireless Network Connection confirmation dialog box asks you to confirm "connecting to an unsecured network", click **Connect Anyway**.
A connection status dialog may appear, while a network address is obtained and initial connection established.
- 5 If the Wireless Network Connection window displays **"Connected"**, you can close this window and proceed to the next procedure.

Logging into the Events Network as a Guest

- 1 Start a web browser and try to connect to any valid Internet site.
 - 2 If a security warning for the Subscriber Portal page appears, trust the Subscriber Portal site and do all the actions that are required to continue browsing
The Subscriber Portal "Sign In" page appears.
 - 3 At the **Guest Pass** text box, enter the text of your guest pass key (by typing or pasting), read the **Terms of Use** section, check **Accept Terms of Use** and click **Sign In**.
The guest wireless network "Sign Out" page appears and indicates that you are now signed in to the Subscriber Portal.
 - 4 If the page you tried to open is not displayed, use the browser's popup blocker to display it.
 - 5 You can now check your personal email and browse the Web.
 - 6 When you finish browsing, click on **Sign Out** at the Sign Out page.
-

Important

With the events pass, you have access to the internet and World Wide web, but you cannot use any services such as file sharing, intranets, or printers. If these services are needed, have your company liaison/contact work with the IT department to set you up with full user access to the secure network.
