

Exploring Intraoperative Nurses' Perceptions of Safety, Culture, and Teamwork in California

Purpose of the Study

This study seeks to explore intraoperative nurses' perceptions of teamwork, culture, and psychological safety within the operating room via Survey

Who Can Participate

You're eligible if:

- You are an intraoperative Registered Nurse who currently works in the operating room, in the state of California, USA
- You may serve in any of the following roles: circulating nurse, scrub nurse, or Registered Nurse First Assistant (RNFA or CRNFA)
- You have at least 1 year of independent intraoperative experience
- You provide direct patient care for at least 20 hours per week

Potential Benefits

While there are no direct benefits to you personally, your participation may help inform future research, educational initiatives, and organizational efforts aimed at promoting a more collaborative, safe surgical environment.

Participation and Survey Details

- Estimated time to complete: 12–15 minutes
- Questions: 31
- Participation: Voluntary, anonymous, and confidential
- Stanford IRB Approval #: 82920
- Survey Link: <https://redcap.link/zayg9rog> or via QR code below

If you have questions about this study, you may contact Brianne Sonnier BSN, RN, CNOR at bsonnier@stanfordhealthcare.org or (650) 519-8567.

Additionally, if you have any concerns, complaints, or general questions about the research or your rights as a participant, please contact the Stanford Institutional Review Board (IRB) to speak to someone independent of the research team at 650-723-5244 or toll free at 1-866-680-2906.
