NEW RESEARCH ON THE VALUE OF UNIVERSAL NASAL DECOLONIZATION: A KEY PIECE OF THE PUZZLE

MARCH 5, 2026 | 6PM - 7PM

OVERVIEW

Nasal decolonization has evolved from a targeted approach to a horizontal strategy that includes all patients for length of stay. This presentation will describe this evolution and explain the paradigm shift from a clinical, operational, and financial perspective. New science will be discussed by the investigator, which will provide an important piece of the puzzle.

Data provided will suggest that protecting all patients is not only good practice, but it can also be done reliably, economically, and safely. The goal of this presentation is to help attendees understand the impact universal nasal decolonization could have for their healthcare organization.

PRESENTED BY

KAREN HOFFMANN
RN, MS, BSN, CIC, FAPIC, FSHEA

Immediately following the education program, our Monthly Touch Base Meeting with Chapter President Cassandra Munro will take place where chapter members will be voting on the proposed bylaws amendments.

LEARNING OBJECTIVES

- Explain the role of the nasal vestibule in healthcare-associated infections.
- Discuss the evolution of nasal decolonization.
- Review the results of 3 new meta-analyses on the efficacy of several nasal decolonization agents.

ACCREDITATION INFORMATION

Terri Goodman & Associates is a provider approved by the California Board of Registered Nursing, CEP# 16550, for **1.0 contact hour**.

This free virtual program will be held via Zoom. A link will be provided upon registration.
