A Heart and Science Approach to Nursing Leadership *Strategies to Support Your Team, Strengthen Your Influence, and Grow Your Impact*

Nurse leaders today face extraordinary pressure—staffing challenges, emotional strain on teams, and constant organizational change. In this environment, effective leadership requires both heart and science: the ability to connect with and support people while also creating clarity, alignment, and direction.

In this practical and engaging session, executive coach Talal Sadeh introduces a simple leadership framework designed to help nurse leaders navigate complexity while sustaining their own effectiveness and impact.

Attendees will leave with practical leadership tools they can immediately apply to support their teams, strengthen their influence, and grow their impact within their organizations.
