From guideline evidence to bedside: actionable clinical strategies to prevent pressure injuries in acute & critically ill patients

Learning objectives:

- Explain the clinical, quality, and financial impact of pressure injuries on patients, nurses, and the healthcare system
- Apply evidence-based nursing interventions to reduce pressure injury risk, including prevention of incontinence-associated dermatitis, strategies to minimize shear and friction, and early identification and mitigation of modifiable risk factors
- Identify key care processes and workflow changes that support sustained reductions in skin injury, while balancing effective pressure injury prevention with healthcare worker safety and ergonomics

When

Thursday, May 14, 2026
5:30PM

Where

Maggiano's
17603 IH 10W
San Antonio, TX
