

Smith+Nephew Academy

Education + Innovation + Excellence

You are invited to attend

Enhancing patient care with innovative solutions for pressure injury prevention

The program addresses the challenges of turning and repositioning patients for pressure injury prevention and introduces LEAF wearable sensor technology. It also discusses new considerations for foam dressings, focusing on how their unique design protects against friction and shear.

Target Audience:

This educational program is intended for physicians, physician assistants, nurse practitioners, registered nurses, nurse leaders and other allied health professionals

Learning Objectives:

1. Evaluate clinical evidence related to patient turning and repositioning
2. Explain how shear contributes to pressure injury development
3. Summarize best practices for patient turning and repositioning and the use of prophylactic dressings.

Date: Thursday, August 13, 2026

**Place: Mastro's Steakhouse
399 Geary Street
San Francisco, CA 94102**

Time: 5:00 pm
