Sensing the Risk: Innovations in Pressure Injury Monitoring and Prevention

Turning and repositioning has been a cornerstone of pressure injury prevention, however it can be difficult to follow in the dynamic clinical setting. This program discusses a technological solution for turning/repositioning, related clinical evidence and patient outcomes from quality improvement projects. The program reviews the features and benefits of LEAF wearable sensor technology.

Target Audience:

This educational program is intended for physicians, physician assistants, nurse practitioners, WOC nurses, registered nurses, nurse leaders and other allied health professionals

Learning Objectives:

1. Recall trends in hospital-acquired conditions, including pressure injuries
2. Summarize clinical evidence related to patient turning and repositioning
3. Synthesize implementation best practices and outcomes related to improving patient turning and repositioning practices

Date: Tuesday, October 13, 2026

Place: Char Restaurant
931 Bob Wallace Ave. SW
Huntsville, AL 35801
