CHEST CANCER S Y M P O S I U M

Saturday, July 18, 2015

Baylor Sammons Cancer Center | 10th Floor Conference Center 3410 Worth Street | Dallas, Texas 75246

CONFERENCE

OVERVIEW

The Chest Cancer Symposium will focus on recent advances in lung cancer screening, therapy and research. Critical updates on the information from ASCO, ESMO and other international meetings will be discussed.

The expert faculty will present key data in support of imaging in screening, immune therapy, minimally invasive surgery, combined modality therapy and the integration of biomarkers for personalized therapy. Discussion will also include recent clinical trial results and impact on patient care.

The format of the conference will include didactic lectures, open discussion and case-based learning.

STATEMENT OF NEED

Thoracic Malignancies are the leading cause of cancer-related death in the United States. Significant progress has been made in the areas of prevention, early detection, diagnosis and treatment. Applying strategies that capitalize on recent advances can positively impact patient outcomes by reducing potential morbidity and improving quality of life.

TARGET AUDIENCE and **SCOPE OF PRACTICE**

Physicians/Fellows: Pulmonologists, Radiologists, Medical Oncologists, Radiation Oncologists, Thoracic Surgeons Members of multidisciplinary teams involved in the care of patients with thoracic cancer: Residents, Physician Assistants, Nurse Practitioners, Research Staff, Pharmacists, Allied Health Professionals

ELEMENTS OF COMPETENCE

This CME activity has been designed to change learner competence and focuses on the American Board of Medical Specialties areas of patient care and medical knowledge.
