

UC Berkeley School of Public Health COEH-CE
Summer Institute 2016

Climate Change &
Worker Health

Wed, July 27, 2016 (9-5)
1515 Clay St, Oakland

Course Description

Climate change brings with it increased risk of catastrophic wildfires, flooding, drought, and sea level rise as well as extreme heat days, which will become more frequent, and the resulting increased air pollution, disease vector changes, as well as the impact of heat itself. Near-term and long-term health consequences of climate change will be explored in this class, as well as proposals for active solutions.

Course Director Marc Shenker, MD, MPH, UC Davis

Speakers

Kent Pinkerton, MD; Gina Solomon, MD, MPH; Laura Van Winkle, MD, DABT; Rupa Basu, PhD; Matt Heberger, PE, (and others TBA)

Topics
