

Emerging Surgical Trends

August 27, 2016 Saturday 7am-3pm
Advocate Lutheran General Hospital, Olson Auditorium

Conference Objectives:

1. Discuss the latest advancements in colorectal surgery procedures, in relation to a better patient experience and faster recovery time frame.
2. Discuss the advantages of the rapid recovery joint replacement programs and the direction that this specialty is moving towards and why.
3. Describe the advantages and disadvantages of robotic hepatobiliary surgery and the advances in this specialty.
4. Define a uterine isthmocele and treatment modalities.
5. Discuss the triple aim of a better patient experience, better health care, and lower costs, through the implementation of coordinated care via the perioperative surgical home model.
6. Describe the different rationale for cardiac lead extraction procedures and the pre-, intra- and post considerations related to it.
7. Discuss the benefits and potential complications related to the Gamma Knife/Awake Craniotomy procedure.

Program Planner/Coordinator:

Sony Mani, MSN, RN, CPAN

Format: Live conference with lectures, Power Point presentations and discussions.
