

## **Program Details**

Date: TUESDAY, MARCH 28, 2017

Time: 6:30 PM

Location: FLEMING'S PRIME STEAKHOUSE &

WINE BAR

720 ALICEANNA ST. BALTIMORE, MD 21202

410-332-1666

## **Program Description**

Despite treatment, many patients with seizure disorders continue to suffer poor outcomes, highlighting the need to augment treatment regimens for better seizure control. This interactive series will focus on clinical decision-making and a real-world case scenario. As part of the series, data supporting the use of a once-daily extended release add-on therapy will be examined.

## **Learning Objectives**

Engage in an interactive roundtable format for clinicians to collectively:

- Discuss management challenges faced on a day-to-day basis in the treatment of seizure disorders
- Consider the potential to improve clinical outcomes with adjunctive antiepileptic drug therapy
- Use a case-based approach to drive discussion around treatment decision points

## Speaker Biography

Trevor Resnick, MD
Chief, Department of Neurology,
Miami Children's Hospital
Associate Professor of Neurology,
University of Miami School of Medicine
Miami, FL

Dr. Resnick is Chief of the Department of Neurology at Miami Children's Hospital, Professor of Neurology and Associate Professor of Neurology at the University of Miami School of Medicine. He received his medical degree from the University of Cape Town South Africa. He completed his Pediatric residency at the University of Connecticut Medical Center and Neurology training at the Albert Einstein College of Medicine in New York. Dr. Resnick has authored numerous scientific publications and edited several books and journal supplements. He is a member of editorial boards of leading epilepsy and neurology journals and lectures widely in North America. His research interests have focused on the neurodevelopmental correlates and treatment of chronic epilepsy and the use of neurodiagnostic techniques for seizure localization and semiology.
