VACCINATION SAVES LIVES

Life is a health journey: vaccination saves up to 3 million lives every year worldwide, but an additional 1.5 million deaths could be avoided with improved vaccination coverage

As a partner on the health journey, we believe in a world where no one suffers or dies from a vaccine preventable disease. We are proud that our vaccines can help to protect us and our loved ones from severe infectious diseases, at every stage of life. Hand in hand with the public health community, we are committed to improving access to life-protecting vaccines, whilst striving to develop new and improved vaccines to enhance health and well-being.
