Historically, Michigan is ranked last in the nation for the ratio of school nurses to students.

To optimize student health, safety and learning, it is the position of the National Association of School Nurses that a professional registered school nurse be present in every school all day, every day.

Every dollar spent on nursing services saves $2.20 in medical costs and lost productivity from teachers and parents.

54% of MI schools report they don’t have access to school nursing services.

68% of schools in the United States have managed a life-threatening emergency requiring the activation of EMS.

In schools where school nurses are present, immunization rates improve, student health records are more accurate, and student health needs are managed more efficiently.
