

Connecting People to GitLab

06th June 2017

GitLab has built-in continuous integration and continuous deployment to test, build, and deploy your code. You can easily monitor the progress of your tests and build pipelines. Then deploy with the confidence that your code has been tested across multiple environments.

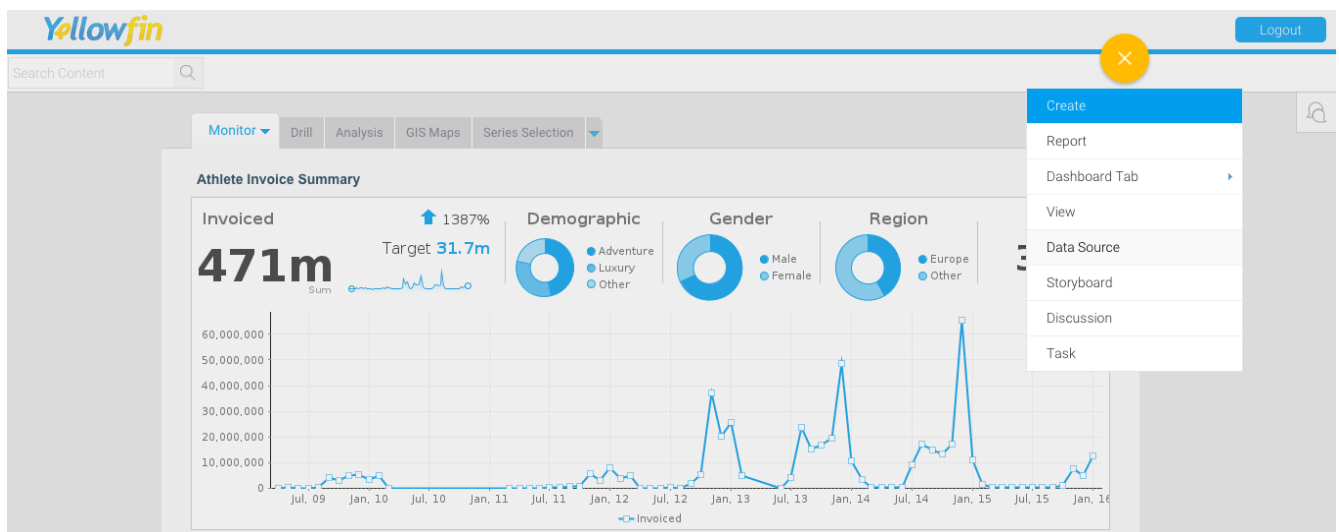

Yellowfin makes connecting to GitLab and sharing insights easy:

1. [Install your connector](#)
2. [Connect to your account](#)

Install your Connector

Add a New Data Source

- a) Log into your Yellowfin Server
(The user must have permissions to add a new Data Source)
- b) Click **Create** and select **Data Source**

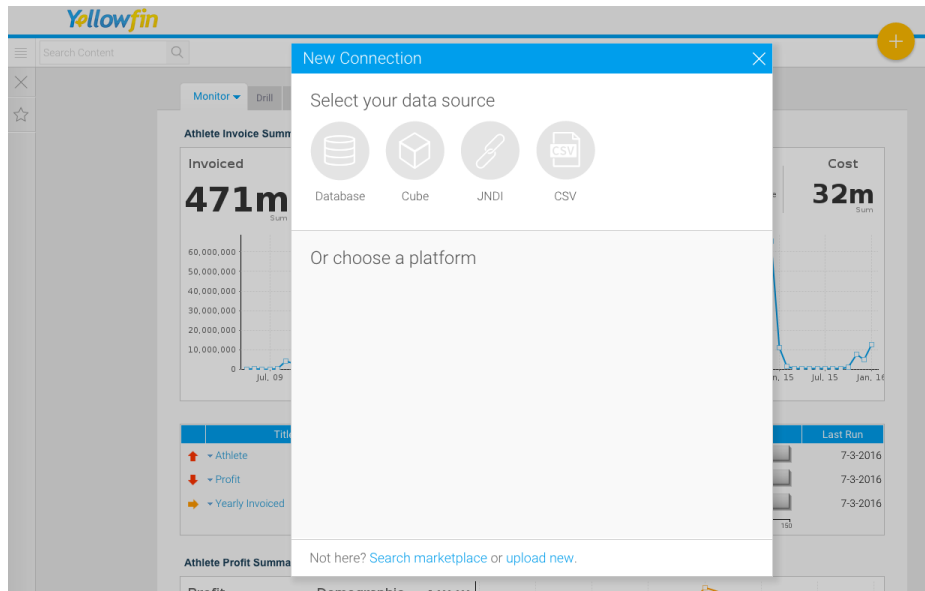

Upload new connector

If you can see the icon for the GitLab Connector at the **New Connection** step, then you can skip to **Connect to your GitLab account**. Otherwise you will need to select the **Not here?** links.

Search Marketplace - download your connector from the Yellowfin Marketplace

Upload New - upload your connector to your instance of Yellowfin

Download the connector from the Yellowfin Marketplace

- c) Go to the [Yellowfin Marketplace](#)
- d) Download the **GitLab Connector** (it's free!)

Upload your new Connector

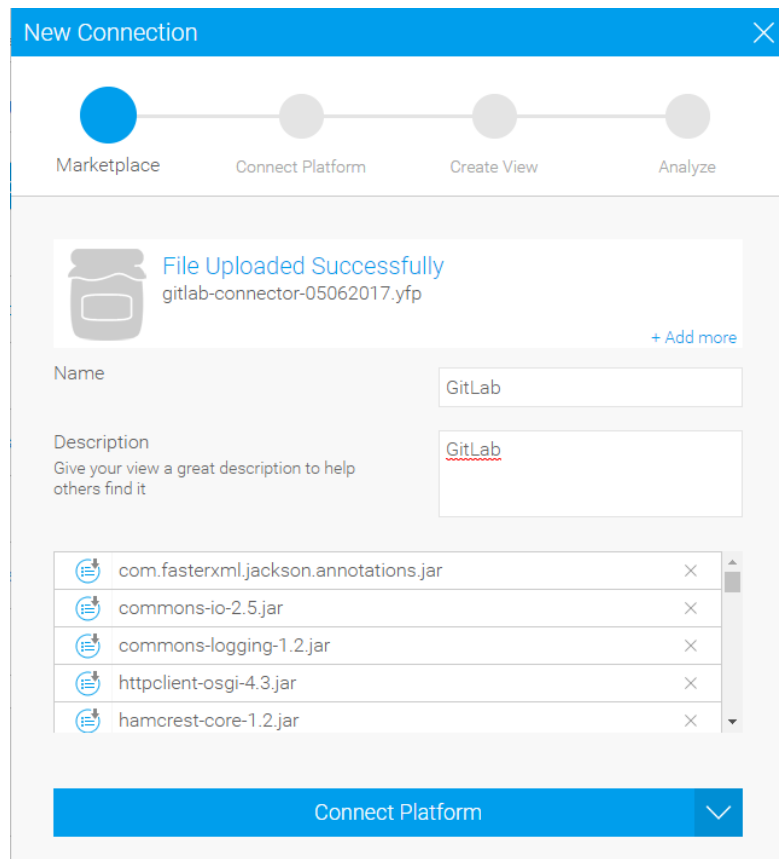

a) Click **Upload New**.

b) Give your connector a **name** and **description**.

c) Click **Connect Platform**.

Your connector will now be available under your **Data Source's** list.

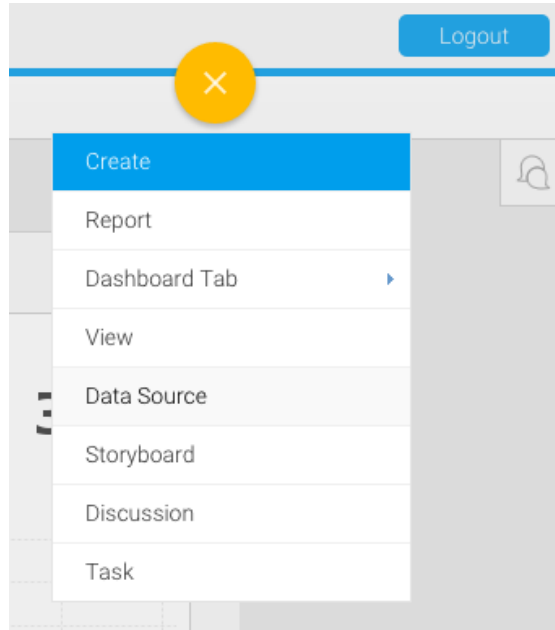

Connect to your Account

Once your GitLab Connector is installed, you can use it to connect to your GitLab account.

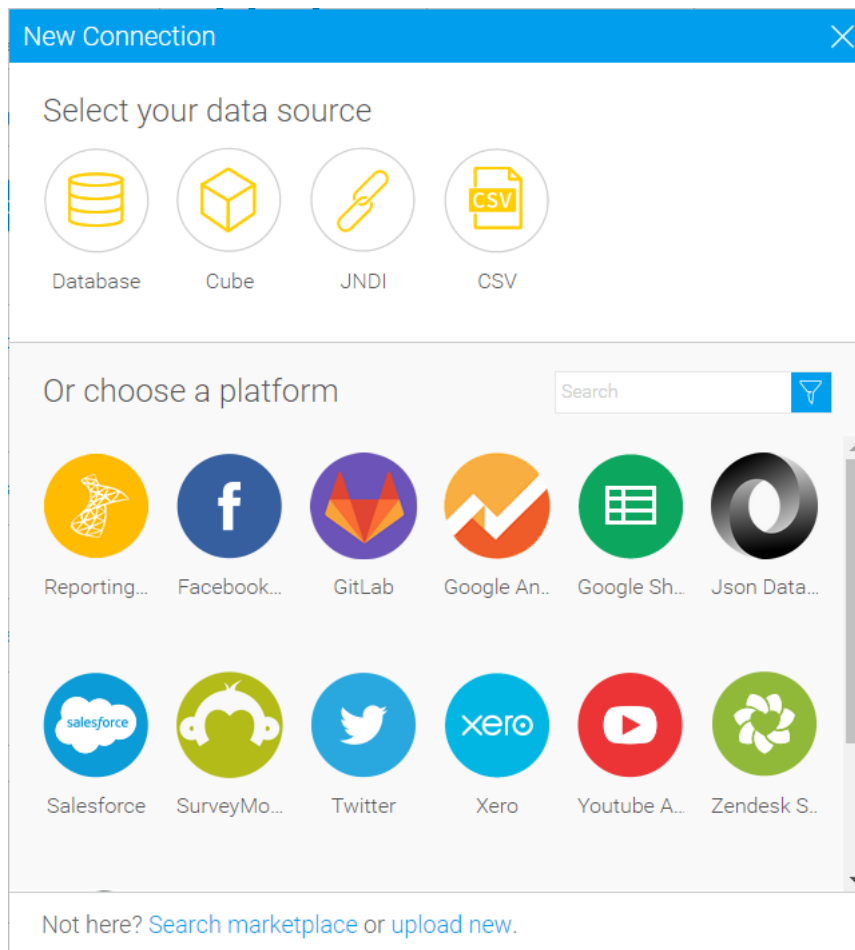

Create a new Data Source

- a) Click **Create** and select **Data Source**.

(If you have just installed your connector, then you will be immediately taken to the next step)

- b) Select **GitLab**

Name your Connection and Enter your Account Details

- c) Give your connector a **name** and **description**.
- d) Provide the host at which your GitLab instance is located.
- e) Paste your account token into the “Private Token” field
- f) Select the number of days for which to download data
- g) Select the API version you would like to use.
- h) Choose whether you would like to store detailed commit statistics.
- i) Click **Launch Pre-Built Content**
