HEALTHCARE SOLUTIONS

FAERON | GUEST

An award-winning collection of seating, Faeron enhances beautiful spaces with its sophisticated presence. With an impressive range of models and configurations, sizes and finishes, materials, options and ability to customize, Faeron can be specified to perfectly suit a multitude of applications within the same installation - providing an attractive and functional cohesiveness to places where people gather.

Above all else, the provision of exceptional comfort (including for periods of extended sitting) has been paramount in Faeron's lengthy development process. With detailed research and painstaking engineering, Faeron's seats and backs have been precision-contoured and shaped with multi-density foam to support the user - and markedly reduce fatigue. Our proprietary spring-seat construction and the optional Flex back provide a unique element of slight movement that greatly enhances comfort and reduces user fatigue - while also extending the life of the product - in comparison to conventional seating.

FAERON | MULTIPLE SEATING & TABLES

FAERON | MULTIPLE SEATING & TABLES

Faeron's lifetime warranty is made possible by the use of the most durable and proven materials and finishes. Our renowned system for replaceability of components and upholstery covers enables product life to be substantially extended, allowing furniture to continue looking as new even with years of use. If components become damaged or degraded, they can be replaced, and optional removable upholstery covers allow replacement of worn textiles. This system is also designed to facilitate infection control and cleaning, by providing the ability to dis-assemble the product or remove upholstery covers for cleaning.

FAERON | PATIENT

The use of recycled and recyclable materials, combined with environmentally-friendly production processes and packaging, have made Faeron a level™-certified product, and a contributor to LEED™-driven specifications. Faeron is certified by the Greenguard™ standard for indoor air emissions, and its unique capability for extending product life make it a responsible environmental choice - and one that will provide exceptional return on investment over time.

FAERON WOOD FEATURES & OPTIONS

URETHANE ARM

The optional Urethane Arm provides enhanced durability and protection for the arms. It is field replaceable if it becomes damaged or degraded and is available in three colors: Black, Grey and Taupe.

SOLID SURFACE ARM CAP

The optional Solid Surface Arm Cap provides enhanced durability, protection and cleanability for the arms. This is field replaceable if this becomes damaged or degraded and is available in 8 standard Corian colors, and custom colors (at an upcharge).

SOLID SURFACE ARM

The optional Solid Surface Arm provides a fully seamless armrest for enhanced durability, protection and cleanability. It is available in 8 standard colors and replaceable as a full side frame if it becomes damaged or degraded.

KINETIC BACK

Provides the chair back with a very pleasant and comfortable rocking motion, which can significantly enhance long-term sitting for patients and guests alike. The durable spring-loaded mechanism provides a range of motion of 20 degrees, and can be field-installed or replaced. It's available on any Faeron Guest or Patient chair back with the exception of the plus seating sizes (30" and 44").

CLEAN OUT

All Faeron seating has a built-in clean out feature: a space at the back of the seat that allows dirt, debris and liquid to fall to the floor for easy clean up and maintenance - designed so that it does not detract from the comfort or appearance of the product.

REMOVABLE & REPLACEABLE UPHOLSTERY COVERS

Faeron chairs (all sizes) are available with removeable seat and back covers. Replacement seat and back covers can be quickly installed on Faeron products that were originally ordered with the Removeable cover option. Replacement seat and back covers can also be installed on Faeron products that were not originally ordered with the removeable cover option, with some simple staple removal on the original seats and backs.

FLEX BACK

The ergonomically designed back has a slight flexing action, to enhance the level of long-term sitting comfort, and provide greater ease of egress.

COMBINATION UPHOLSTERY

For a nominal upcharge, Faeron Guest and Patient chairs can be upholstered in combinations of two or more upholstery covers on the same units: seats, backs and closed arm panels can be individually upholstered with a specific cover.

STEEL SEAT FRAME

Steel seat frames are joined to other components with hardened steel bolts and inserts, ensuring exceptional durability and strength. In addition they ease re-configurability and on-site replacement of damaged or degraded components.

WALL SAVER

The angle of the back and the rear legs are designed to keep the back away from the wall, to prevent wear and damage to both the chairs and to the walls of the facility.
