HEALTHCARE SOLUTIONS

KINETIC BACK OPTION

This optional feature provides the chair back with a very pleasant and comfortable rocking motion, which can significantly enhance long-term sitting for patients and guests alike. The durable spring-loaded mechanism provides a range of motion of 20 degrees, and can be field-installed or replaced. It's available on any Jordan chair back - Guest, Patient and Multiple Seating - with the exception of the Bariatric sizes (30" and 44").

CLEAN OUT

All Jordan seating models have a built-in clean out feature: a space at the back of the seat that allows dirt and debris to fall to the floor for easy clean up and maintenance - designed so that it does not detract from the comfort or appearance of the product.

REPLACEABLE COMPONENTS

Jordan chairs are uniquely designed to allow virtually all major components to be field replaced, providing a very cost effective means to significantly extend the life of the product. Seats, backs, frames are field replaceable.

REPLACEABLE SEAT & BACK COVERS

Jordan Patient Seating can be specified with removable and replaceable seats and covers, to allow for cleaning, repair and replacement of upholstery. Complete seats and backs can also be easily field-replaced.

STEEL SEAT FRAME

The structural seat frame is made from welded steel with a powder-coated finish that allows Jordan to well exceed ANSI/BIFMA standards. This seat structure also allows damaged arm and leg frame components to be replaced without replacing the entire frame or unit, while allowing the back to have a slight flexing action.

All products are air emissions certified and are available as FSC® certified
