AESTHETIC MEDICINE AND MEDICAL SPA

Laser Hair Removal

We use the Cynosure Elite™ laser machine which combines two optimal wavelengths in one system: 755 nm Alexandrite and 1064 nm Nd:YAG. Elite™'s ability to switch between two gold standard wavelengths means that you can select the most appropriate wavelength based on your skin type whether dark or fair. It also has an air cooling system that helps make the experience more comfortable.

Fractional Laser Skin Resurfacing and Laser Peel

Fractional laser skin resurfacing with the latest system from Sciton Joule™ allows you to minimise acne scars, pigmentation, wrinkles and areas of rough skin on the face and neck or elsewhere. Ask us for a free consultation to learn more.

Forever Young BBL™ (Broad Band Light)

Sciton Forever Young BBL™ is a device that functionally rejuvenates the skin by affecting genetic collagen deposition, leading to improvements in fine wrinkles and pigmentation. BBL™ is a powerful, versatile IPL system that is a perfect choice for a broad range of treatments including acne reduction, dermal rejuvenation, microvasculature reduction, and benign pigmented and vascular lesion reduction. It is also used for permanent hair removal through intense pulsed light (IPL).

VISIA® Complexion Analysis

Visia® Complexion Analysis allows you to measure spots, pores, wrinkles, evenness, and UV photodamage on your skin via multispectral imaging, accurate skin tone reproduction with IntelliFlash® Lighting and 3D viewing. It allows you to compare your skin features to other individuals of the same age and skin type. Other features include eyelash analysis and a prediction feature which can show you what your skin could like without treatment 5-7 years in the future.

Medical Facials

Luxury Caviar Medical Facial. Caviar extract is very rich in vitamins A, D, B1, B2, B6 and micro-elements. It helps firm and hydrate the skin. Our skilled therapist at Acacia Medical Centre - Dubai can tailor your treatment with carefully selected skin care products based on your skin type. As a matter of course we provide also the classic facial procedure to clean, brighten and revitalise facial skin.

Facial Rejuvenation

We use chemical peels to exfoliate the skin and get rid of dead skin cells. It helps even out the tone, improve the appearance of skin, as well as improve skin health by unblocking clogged pores.
