

TREATMENTS

Professional Scaling and Polishing

Regular scaling and polishing by a dentist helps keep your teeth and gums healthy by making it easier for you to keep your teeth clean at home. You should see and feel the difference.

Zoom Teeth Whitening

Zoom White Speed is clinically proven to whiten teeth up to eight shades in 45 minutes and outshines the competition when it comes to results and efficacy. The procedure consists of three 15-minute sessions. A fresh layer of whitening gel is applied after each session as the old gel is removed from your teeth. Whitening is considered one of the safest procedures available in dentistry.

Cosmetic Fillings

Tooth coloured filling is the most common cosmetic dentistry solution to preserve the beauty of the smile. With the help of tooth colour fillings, patients have the privilege to fill out cavities to suit the natural colour of the teeth.

Veneers

Dental veneers are wafer-thin, custom-made shells of tooth-coloured materials designed to cover the front surface of teeth to improve your appearance. These shells are bonded to the front of the teeth changing their colour, shape, size or length.

Dental Crowns

Over time, teeth can be damaged, cracked or weakened by decay. Dentists use a crown to entirely cover or "cap" a damaged tooth. Crowns are made to match the colour of your natural teeth, and besides strengthening an impaired tooth, these can be used to improve your teeth's appearance, shape or alignment.

Orthodontic Metal Braces and Ceramic Braces

Not everyone is born with beautiful teeth. Crooked and misaligned teeth are known sources of self-consciousness, embarrassment and low self-esteem. At our Dental Clinic Dubai, we offer a variety of orthodontic solutions to help you achieve a healthy and beautiful smile.

Invisalign Clear Aligner

Invisalign straightens your teeth without wires and bracket but by using a series of clear, customised, removable appliances called aligners. It is virtually undetectable, which means hardly anyone will know that you're straightening your teeth.

Incognito Lingual Braces

Unlike traditional dental braces, Incognito Lingual Braces are completely customised to the shape of your teeth and to your individual dental situation. These lingual braces are perfect for those patients who like to go about their normal routines without feeling self-conscious about their braces. Incognito braces are suitable for children, adolescents and adults who want to straighten their teeth and correct their tooth position.
