HeartSine Samaritan PAD 350P

Be Prepared for Cardiac Emergencies Without Impacting Your Bottom Line

HeartSine Samaritan PAD 350P Package - $1175

AEDs have become an expected standard of care in the workplace, with employees expecting AEDs to be readily available in office buildings, factories and manufacturing facilities. But how can you meet these expectations to ensure their safety without decreasing your bottom line?

Not all AEDs are created equal. The HeartSine® samaritan® PAD surpasses all others as it uniquely combines clinically advanced technology with the lowest cost of ownership on the market. And it’s all available in a simple-to-use package that carries an industry-leading 10 year warranty, with flexible finance and program management options that affordably help mitigate risk and liability in deploying these life-saving devices.

You have a choice of AEDs for all of your facilities, so you should choose the AED that protects not only your employees and visitors, but your bottom line as well.

FREE HeartSine Wall Cabinet Included with Each AED Package ($150 Savings)

Surface Mount Cabinet with Square Edges (11"W x 12" H x 7" D)

- 20 Gauge Cold Rolled Steel With White Powder Coat Paint Finish
- Magnetic Door Catch With Handle Built Into Door
- Identification Graphics: “AED”, “Pull to Open” & “Warning Alarm System”
- Acrylic Pre-Installed In Cabinet
- Audible Alarm:
  - Sounds a Powerful 85dB Warning Horn When Door Is Opened
  - Trouble Free Touch Switch Turns The Alarm On When Door Is Opened.
  - Keyed on/off Switch
  - Self Contained 9 VDC Alkaline Power Source Is Provided.

samaritan® PAD 350P
Public Access Defibrillator with CPR Coaching

Compact, Easy-to-Use, Lifesaving Technology

Sudden Cardiac Arrest (SCA) is a leading cause of death globally. Response time is critical for survival. The samaritan® PAD 350P is designed especially for use in public areas by providing a sophisticated defibrillator for adult or pediatric use, inside a lightweight and easy-to-operate system.

Compact in Size, Long on Ability

**Portable and lightweight.** The samaritan PAD 350P is lighter (2.4 lbs/1.1 kg) and smaller than other defibrillators.

**Durable.** The samaritan PAD 350P resists shock and vibration and carries an IP56 Rating, the industry’s highest rating against dust and moisture ingress. It also carries a ten year unit warranty.

**Advanced technology.** The samaritan PAD 350P utilizes proprietary electrode technology, advanced and stable firmware, and proprietary SCOPE™ Biphasic technology (an escalating and low-energy waveform that automatically adjusts for patient impedance differences) to assess rhythm and recommend defibrillation if necessary.

*Self-Compensating Output Pulse Envelope (SCOPE) technology automatically compensates energy, slope and pulse envelope for the patient.

Easy-to-Follow Visual and Verbal Guides

**User-friendly.** The samaritan PAD 350P features easy-to-understand visual and voice prompts that guide a user through the process including CPR coaching.

**Two-button operation.** Only two buttons, ON/OFF and SHOCK, are required for straightforward operation.

**Always ready.** A System Status Ready Indicator flashes to show that the complete system is operational and ready for use. The device automatically runs self-check each week.

Real Economy for the Real World

**Two parts, one expiration date.** Pad-Pak™ cartridge combines battery and electrode pads, with one expiration date to monitor.

**Low cost of ownership.** With a shelf life of four years from date of manufacture, the Pad-Pak offers significant savings over other defibrillators that require separate battery and pad units.

Pad-Pak and Pediatric-Pak with pre-attached electrodes.

The HeartSine PAD’s built-in intelligence and unique pediatric Pad-Pak ensure the appropriate energy level is delivered for children.
### Physical

</thead>
<tbody>
<tr>
<td>Size:</td>
</tr>
<tr>
<td>Weight:</td>
</tr>
</tbody>
</table>

### Defibrillator

| Waveform: | Self-Compensating Output Pulse Envelope (SCOPE) Biphasic waveform. Optimized biphasic escalating waveform compensates energy, slope and envelope for patient impedance |

### Patient Analysis System

| Method: | Evaluates patient’s ECG, signal quality, electrode contact integrity and patient impedance to determine if defibrillation is required |
| Sensitivity/Specificity: | Meets ISO 60601-2-4 |

### Environmental

| Operating/Standby Temperature: | +32°F to +122°F (0°C to 50°C) |
| Temporary Transportation Temperature: | 14°F to 122°F (-10°C to 50°C) for up to two days. Unit must be returned to standby/operating temperature for 24 hours before use. |
| Relative Humidity: | 5% to 95% (non-condensing) |
| Water Resistance: | IEC 60529/EN 60529 IP56 |
| Altitude: | 0 to 15,000 feet (0 – 4,575 meters) |
| Shock: | MIL STD 810F Method 516.5, Procedure I (40 G’s) |
| Vibration: | MIL STD 810F Method 514.5+ Category 4 Truck Transportation – US Highways Category 7 Aircraft – Jet 737 & General Aviation (Exposure) |
| EMC: | EN 60601-1-2 |
| Radiated Emissions: | EN55011 |
| Electrostatic Discharge RF Immunity: | EN61000-4-3 B0MHZ-2.5GHZ (10 V/m) |
| Magnetic Field Immunity: | EN61000-4-8 (3 A/m) |
| Aircraft: | RTCA/DO-160F, Section 21 (Category M) |
| Falling Height: | 3.5 feet (1 meter) |

### Energy Selection

| Adult: | Shock 1: 150J; Shock 2: 150J; Shock 3: 200J |
| Pediatric: | Shock 1: 50J; Shock 2: 50J; Shock 3: 50J |

### Charging Time

| New Battery: | Typically 150J in < 8 seconds, 200J in < 12 seconds |
| After 6 Discharges: | Typically 150J in < 8 seconds, 200J in < 12 seconds |

### Event Documentation

| Type: | Internal Memory |
| Memory Capacity: | 90 minutes of ECG (full disclosure) and event/incident recording |
| Playback Capabilities: | Custom USB cable directly connected to PC and Saver™ EVO Windows-based data review software |

### Materials Used

| Housing: | ABS – Electrodes: Hydrogel, Silver, Aluminium and Polyester |

### Pad-Pak — Electrode and Battery Cartridge

| Adult Pad-Pak (Pad-Pak-01) and Pediatric Pad-Pak (Pad-Pak-02) |
| Shelf Life: | 4 years from manufacture date |
| Weight: | 0.44 lbs (0.2 kg) |
| Size: | 3.93 in x 5.24 in x .94 in (10 cm x 13.3 cm x 2.4 cm) |
| Battery Type: | Lithium Manganese Dioxide (LiMnO2) |
| Capacity: | > 60 shocks at 200J |
| Electric: | 18V, 1.5 Amp Hrs |
| Electrodes: | HeartSine samaritan® disposable defibrillation pads are supplied as standard with each device |
| Placement: | Anterior-lateral (Adult); Anterior-posterior (Pediatric) |
| Active Gel Area: | 15.5 in² (100 cm²) |
| Cable Length: | 3.5 feet (1 meter) |

HeartSine® Warranty

Lifesaving, Pure and Simple With Our New Industry-Leading Warranty

The samaritan® PAD (Public Access Defibrillator) is the number one choice for durability, reliability and low cost of ownership. Clinically superior. Technically advanced. The HeartSine PAD is the smallest and lightest AED on the market.

10-Year Product Warranty

Superior Protection
Both HeartSine samaritan PADs are the best backed AEDs on the market today.

- Our 10-year warranty is 3-5 years better than the industry standard
- IP56 (Ingress Protection) rating provides the highest level of moisture ingress protection in the industry
- Complimentary, downloadable software upgrades

Extended Life Pad-Pak™

Lowest Overall Costs of Ownership
Our innovative Pad-Pak cartridge houses both the battery and electrodes for the device.

- Extended 4-year shelf life
- One expiration date
- Track and inventory just one consumable item
