Is "their" philosophy of government so important that "they" are willing to destroy the United States, do it our way or else? First Johnson and now Nixon. Hitler's propaganda specialist (Goebbels) would be proud of his proteges.

The steps in destroying a leader are:

1. Destroy his credibility.
Accuse him of a crime, repeat it day after day after day. The crime does not need to be against the law, constant repetition, innuendo, associations, etc. will take care of that.
2. Elaborate on the seriousness of the crime.
Interview people like Senator Tunney and/or Senator Muskie.
3. Create the Bandwagon effect by securing endorsements one at a time, a Democrat this week (Tunney), a Republican next week (Senator Brooks), a magazine next (Time), and a newspaper (Detroit Daily News).
4. Overcome traditional resistance and lack of a cause by making the slogans common, "Inability to Govern," "Impeachment". These two phrases will become extremely popular.

I just cannot believe that Oklahoma is the only sensible state with sensible people in the union, but the Gallup poll would lead us to believe that.

Dear Mr. and Mrs. Green:

Many thanks for sending me a copy of your letter "To the Editor." I think your statements are well put and well taken, and I appreciate so much having your thoughts on this matter.

I am like you -- I just cannot believe that Oklahoma is the only sensible state with sensible people either. I think maybe we Oklahomans just make ourselves heard a little better when it comes to gooddcommon sense.

Again, I am glad to have your expressions, and you may be sure they will be remembered. We would, of course, welcome your further comments at any time.

Sincerely,

Happy Camp
Member of Congress
